

PREVENT PLANT PREPARATION

As you've likely heard, prevent plant is becoming a reality for many growers. When fields are open during late spring/summer, whether part of a planned system or created by unfortunate weather, **it is critical to keep soils covered**, taking advantage of the longer seeding window and maintaining soil health benefits.

If prevent plant is a possibility in your area, View our *Prevent Plant Tips and Recommendations* Today: (<https://bit.ly/2JWD0kd>).
