

Bulls-Eye Deer Turnips

BRIER RIDGE® Food Plot Seed

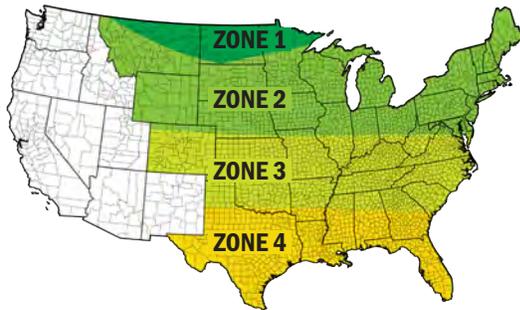

- Early fall planted annual turnip blend offering early/late fall food source
- Performs well on light to heavy soil types in light shade to full sun
- Turnips will remain green until 10° F
- Optimally planted 6 to 8 weeks prior to killing frost, sugars will flush vegetative growth after frost, making it an appealing food source
- Unique blend of turnips provide extensive above & below ground growth

Bulls-Eye is intended for use as an attractant for deer and other wildlife. Plant Bulls-Eye at least 60 days before killing frost if possible to allow adequate growth. Bulls-Eye will produce extensive vegetative growth, with a large bulb.
