

tuff stuff®

tall fescue based mix

**IMPROVED
FORMULA**

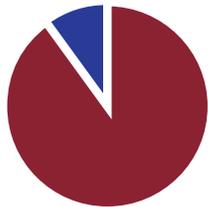

AVAILABLE IN 5, 20 & 50#

Ideal for high traffic athletic fields & golf course roughs

- Replaces Top Athletic & Watertight H2O
- Low input, sustainable mix for water conservation
- Tolerates heat, drought & poor, sandy or loamy soils
- Low maintenance, very high quality turf

Superior turfgrass varieties that provide the best overall drought, insect and disease-tolerant turf. Excellent for areas where high quality turf is important and lower maintenance is desired. Tuff-Stuff® forms a rugged, durable turf that stands up to constant use.

90% Tall Fescue (3 Elite Varieties)
10% Kentucky Bluegrass (1 Elite Variety)

ESTABLISHMENT (DAYS) **10 - 21**

STRESS TOLERANCE (1=WORST, 5 = BEST)

HEAT	5	WEAR	5
DROUGHT	5	TRAFFIC	5

ELITE VARIETIES - Many of our mixes feature elite turf varieties. An “elite” variety is an improved variety holding the most distinguished characteristics of that species.

Look for the “**XRE +**” icon for products with tall fescue varieties featuring even earlier, more aggressive and rapid tillering traits and rhizome expression. These products exhibit superior density, excellent wear tolerance and rapid recovery.

The **A**lliance for **L**ow **I**ntput **S**ustainable **T**urf is a non-profit, university and industry, cooperative that serves to test, identify and promote varieties to consumers that maintain acceptable turf quality while requiring reduced water, chemical and fertility inputs. To become an “A-LIST Approved Variety”, a variety must have demonstrated superior performance in A-LIST trials.
