

Autumn Energy

- Early fall planted annual species offering early/late fall food source
- Performs well on light to heavy soil types in light shade to full sun
- Portion remains green until air temps reach 10 to 15° F
- Optimally planted 6 to 8 weeks prior to killing frost

Autumn Energy is a mix of PlotSpike® oats, purple top turnips and Tillage First® daikon radish. This mix was formulated to be planted 6 to 8 weeks prior to a killing frost, and allows for forage in late fall and early winter. After a hard frost in fall, sugars will flush the vegetative growth of the turnips and radish offering succulent forage. PlotSpike® oats will grow quickly, and provide extensive leafy forage for deer to browse from early fall into cooler temps due to their winter hardiness.

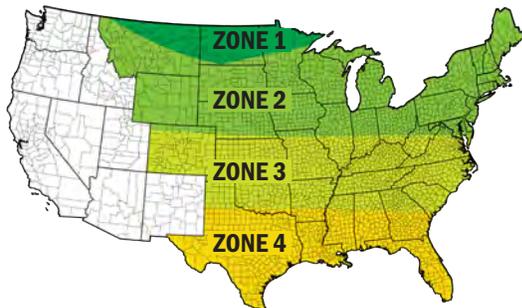

LIFE CYCLE:	SEEDING RATE (LBS/ACRE):	BAG SIZE (LBS):
ANNUAL	40 - 50	25

- 90% PlotSpike® Oats
- 6% Tillage Radish®
- 4% Purple Top Turnips
