

Forage First® Alfalfa

Always Innovating

As a forage leader for over 70 years, we've always worked hard to improve. Continual research and development of new varieties ensures the right balance of protein and feed quality, recovery and grazability to suit each animal and operation. Every top-performing variety is tested in many trials before being put to use. From the latest genetics to new treatments and technologies, we have you covered.

FORAGE FIRST
WHEN YIELD AND QUALITY MATTER®

FF 4319.A2 RR Alfalfa

- Combines Roundup Ready® technology with higher resistance to Aphanomyces Race 2
- Unique wet soil disease resistance package promotes better stand establishment, persistence and forage yield
- Delivers long stand life under adverse weather and soil conditions

Cutting System: 3 - 5

DISEASE AND PEST CONTROL

Phytophthora Root Rot	HR	Aphanomyces Race 1	HR
Verticillium Wilt	HR	Aphanomyces Race 2	HR
Anthracoese	HR	Pea Aphid	R
Bacterial Wilt	HR	Potato Leafhopper	NR
Fusarium Wilt	HR		

Fall Dormancy	4.3
Winter Survival	1.9
Total DRI	35/35

CROSSECOAT™
PREMIUM SEED COATING

FF 42.LH Alfalfa

- High-yielding, leafhopper resistant alfalfa
- Dramatic improvements in agronomic performance, forage yield and feed quality under leafhopper pressure
- Highly resistant to stem nematode management programs

Cutting System: 3 - 5

DISEASE AND PEST CONTROL

Phytophthora Root Rot	HR	Aphanomyces Race 1	HR
Verticillium Wilt	HR	Aphanomyces Race 2	NR
Anthracoese	HR	Pea Aphid	R
Bacterial Wilt	HR	Potato Leafhopper	HR
Fusarium Wilt	HR		

Fall Dormancy	4.0
Winter Survival	1.9
Total DRI	30/30

CROSSECOAT™
PREMIUM SEED COATING

LEAFHOPPER
PROTECTION

FF 42.A2 Alfalfa

- Highly resistant to Aphanomyces Race 2
- Perfect disease resistance package
- Top forage yielder in trials
- Excellent winter survival and persistence
- Suitable for heavy and wet soils
- Fast recovery after cutting

Cutting System: 3 - 5

DISEASE AND PEST CONTROL

Phytophthora Root Rot	HR	Aphanomyces Race 1	HR
Verticillium Wilt	HR	Aphanomyces Race 2	HR
Anthracoese	HR	Pea Aphid	R
Bacterial Wilt	HR	Potato Leafhopper	NR
Fusarium Wilt	HR		

Fall Dormancy	4.0
Winter Survival	1.9
Total DRI	35/35

CROSSECOAT™
PREMIUM SEED COATING

INTRODUCING
CrosseCoat™
PREMIUM SEED COATING

All Forage First® alfalfas include CrosseCoat™, an elite platform of proven seed coating and treatments that:

- Improves seeding distribution
- Improves seed-to-soil contact
- Improves water intake
- Protects against fungal attacks
- Enhances nutrient uptake
- Enhanced nodulation to provide superior nitrogen fixation

Resistance Ratings:

HR = Highly Resistant, 51% or more resistant plants

LR = Low Resistance, 6 - 14% resistant plants

R = Resistant, 31 - 50% resistant plants

S = Susceptible, 0 - 5% resistant plants

MR = Moderately Resistant, 15 - 30% resistant plants

NR = Not Rated
