

Fiesta 4 Perennial Ryegrass

- Spreading perennial ryegrass
- Gray leaf spot resistant
- Insect resistant
- Wear tolerant

Ryegrasses were brought to the U.S. from Europe and are now grown and planted throughout the country. Ryegrasses (both annual and perennial) can be grown on their own in the northern states for lawns. In many areas of the country, largely because this grass is so versatile, it is incorporated in seeding mixes with other grasses.

USES: Lawns, athletic fields, golf course, all general use. Excellent when used in mixes. Ideal in sun and tolerates partial shade.

IDENTIFICATION: A fast growing bunch type grass that spreads by tillers (stems). Leaves are dark green and glossy on the underside, tapered, pointed with a folded vernation (stem). Varieties available both as annuals, intermediates and perennials.

ESTABLISHMENT: Germinates and establishes very quickly. Fills by tillers. Popular over-seeder because of quick germ.

SEEDING RATES (LBS/1,000 SQ FT)

SEED INFORMATION

NEW	6 - 8	SEEDS/LB	270,000
OVER	3 - 4	GROWTH HABIT	BUNCH TYPE, TILLERS
		ESTABLISHMENT (DAYS)	7 - 10*

*Under prime conditions

Spreading **T**echnology - Many perennial ryegrass products in our portfolio benefit from spreading technology, featuring early development of aggressively spreading rhizomes and rapid tillering. These spreading traits boast improved wear tolerance and recovery plus excellent density and persistence.
